

The Evapo-Rust Solution is a rust removal product from metal parts before packaging them for storage or shipment.

Rust Remover and Anti-Rust Liquids are water-based and safe to use without special handling, and they can be sprayed or fogged into hard-to reach areas, using normal industrial application equipment.

There are 2 types of effective, fast-acting, non-toxic, non-acidic products:

- **Evapo-Rust®:** Eco-friendly liquid rust remover that cleans metal without harming copper, brass, aluminum, plastic, rubber, wood or vinyl. Do not affect iron/metal compositions, plating or even non-oxide paint or chrome coatings that are still adhered to the surface. Evapo-Rust washes away surface rust without scrubbing that virtually eliminates the need for laborious blasting, grinding or the use of harsh caustics and chemicals.

Simply immerse the rusted item into EVAPO-RUST and watch the rust disappear in approximately 30 minutes to 24 hours. Removes rust 100% - One gallon de-rusts approx. 300 lbs. of moderately rusted steel, or about 20 lbs. of dry rust. Sold in 1, 5 & 55 gallon container.

Typical applications: • Engines • Automotive • Turbines • Tools • Manufacturing • Paint Prep • Marine/Boat Parts • Ship Yards • Construction • Machine Shops

Features:

- Biodegradable and non-toxic, - Safe for the environment.
- Disposable - Spent solution can be disposed safely down the drain in most cases.
- Reusable
- Non-acid, non-caustic - Neutral pH means no special handling or gloves required.
- No pit un-rusted steel
- No scrubbing
- No VOC's or HAP's
- Non-corrosive and non-flammable
- Ready-to-use
- Odor-free
- Safe on multi-surfaces
- Water-based solution

- **Nox-Rust® Premium Rust Removing Gel:** Eco-friendly rust removal for large, hard-to-move vertical metal structures and equipment including railings, partitions, columns, lockers, and tools without scrubbing or sanding. The thick Nox-Rust Gel works on steel, iron and most metal surfaces without harming paint or rubber. The brush-on rust remover gel that clings to metal surfaces and light rust will begin to break up within 15-20 minutes starts to work in minutes, when rust is loose, wipe away with a soft cloth or rinse with water. The clean part is ready for next process, storage or shipment. Proved by many automotive OEMs and their suppliers.

Typical applications: Vertical surfaces that cannot be immersed in rust remover liquids • Large metal components, assemblies and machinery • Long or heavy metal forms, bars and rollers • Automotive parts • Tools • Construction equipment • Enclosures, walls, dividers • All types of metalworking and metal preparation applications

Features:

- Economical effectively restores metal surfaces.
- Safe on multi-surfaces
- Water-based
- Fast-acting
- Odorless
- Acid-free
- No scrubbing
- Non-hazardous
- No VOC's or HAP's
- Non-toxic
- Biodegradable
- Easy to use
- No special handling required

Protect the cleaned metal surfaces to keep it corrosion-free until ready for use

by wrapping in VCI Packaging: Paper Wrap, VCI Bags, VCI Poly-Film Sheeting,

Stretch Or Shrink Wrap, Rust Preventive Liquids, Emitters or Foam.
