

CARDBOARD CONTAINERS GUIDE

Storage Boxes and Containers

Bin Boxes, One Piece, Self-Locking: Ideal for organizing work areas and parts storage. Popular for auto dealerships, warehouses, electronics companies, workshops, pharmacies and hospitals. Self-locking construction requires no tape, staples or glue required for assembly.

Bin Box Dividers, One Piece, Self-Locking: Ideal for storage of parts on standard shelf depths. Dividers are separate inserts. Assemble in seconds due to the self-locking construction.

Record File Storage Boxes with Lids: Available in letter or legal sizes, white or Kraft. Used for photo albums or non-paper artifacts. Maximum stacking weight: 350lb.

Tote Tray, One Piece, Self-Locking: Easy-to-assemble, self-locking tote is nest-able when empty, and offer twice the compression strength of regular corrugated trays. Coating resists oil and moisture, increasing the life of the tote. Built in hand holds make carrying easy.

Telescoping Boxes: Ideal for paintings, golf clubs, TV boxes, and large pallet-sized containers. Adjustable, two-piece body/lid box sets meet many diverse packaging.

TV, Snowboard, Guitar, Golf and Ski Boxes: Special equipment shipping boxes.

Mailers and Folders

Die Cut Mailers: These crush-resistant mailers have double side flaps and tops that tuck in, providing added strength. Very strong, yet light in weight, to save shipping costs. Fold together in seconds without tape, glue or staples.

Five Panel Folders, One Piece, Self-Locking: These boxes have three layers of cardboard on each end when assembled. Five-panel folders are therefore often used for packing long items with smaller diameters, which may be easily damaged if they pierced the ends of the carton. Some applications include tubes, cones, rods, light fixtures, shade rollers, umbrellas, furniture legs, window and blind components, picture frame rails, etc.

Meat Pattie Boxes: Corrugated meat patty boxes are for storage and shipping ground or processed meats. Seal with tape. Vent slots provide air circulation when refrigerated.

One Piece, Self-Locking, Vari-Depth Folder: Vari-depth folders allow these die cut boxes to be sized as required. Seal in seconds with tape or glue. Often used for shipping stationery, books, records, photos, binders, and disks.

Side Load Mailer: Self-sealing corrugated cardboard side load mailers have adhesive strips for closing them without glue, tape, or staples. These boxes work well for sending books, catalogs or other printed materials, mirrors, picture frames, photos or other flat items.

Triangular Tubes: Triangular tubes offer great sidewall strength. Popular choice for blueprints, posters, drawings, unframed artwork, etc. Tubes open long the length of carton to making packing and removal easy.

Triangular Mailer: The triangular shape of these mailers prevents rolling and adds strength once assembled. They will rest on flat surfaces without rolling off and are stronger than conventional round mailing tubes.

Mailing Tubes: For shipping or storing posters, maps, drawings and promotional items. Plastic end caps fit securely. Cut to length.

Shipping Containers

Regular Slotted with Variable Flaps: Similar to an RSC box, except the outer flaps overlay by an inch or more, used where the length of the box is significantly greater than the width, making for a long distance between end flaps. Overlapping the outer flaps prevents them from separating. Kraft or White.

Regular Slotted Containers with Extra Depth Scores: Similar to an RSC (regular slotted container), except the corners can be cut down to another score line to decrease the depth of the box. Offer the benefits of having many box sizes in your inventory, without tying up valuable warehouse space.

Bulk Containers, Double Walled: Offer twice the protection of standard cartons, to ensure that your shipments arrive safely. In addition, they offer improved stacking strength and can withstand heavier loads. Ideal for packing, shipping and storage applications.

Pads and Sheets

Honeycomb Pads: Provide superior cushioning, and protection for items up to 1,135 kg (2,500 lb). Made of recycled Kraft paper, they are an environmentally friendly alternative to bubble, foam or wood. Easily cut with a knife. Light weight makes them the perfect choice when trying to cut shipping costs. Ideal for void filling, blocking, bracing and layering, computer components, pre-assembled products with moving parts, and furniture.

Corner Pads: Die-cut, double-walled corner protectors. No tape, glue or staples are required for assembly. Our corrugated corner pads protect furniture, cabinets, windows, doors, photos, etc. during shipping

Corrugated Cardboard Pad: Cut to size – White, Kraft (Double wall or Single wall)
